

## 2.2.13 Ensure HTTP Proxy Server is not enabled (Scored)

### Profile Applicability

```
Level 1 - Server  
Level 1 - Workstation
```

### Description

Squid is a standard proxy server used in many distributions and environments.

### Rationale

If there is no need for a proxy server, it is recommended that the squid proxy be deleted to reduce the potential attack surface.

### Audit

Run the following commands to verify squid is not enabled:

```
# systemctl is-enabled squid  
disabled
```

Verify result is not "enabled".

### Remediation

Run the following command to disable squid:

```
# systemctl disable squid
```
