

3.1 Network Parameters (Host Only)

List of content

- [3.1.1 Ensure IP forwarding is disabled \(Scored\)](#)
- [3.1.2 Ensure packet redirect sending is disabled \(Scored\)](#)

Description

The following network parameters are intended for use if the system is to act as a host only. A system is considered host only if the system has a single interface, or has multiple interfaces but will not be configured as a router.
