

3.3 IPv6

List of content

- [3.3.1 Ensure IPv6 router advertisements are not accepted \(Scored\)](#)
- [3.3.2 Ensure IPv6 redirects are not accepted \(Not Scored\)](#)
- [3.3.3 Ensure IPv6 is disabled \(Not Scored\)](#)

Description

IPv6 is a networking protocol that supersedes IPv4. It has more routable addresses and has built in security. If IPv6 is to be used, follow this section of the benchmark to configure IPv6, otherwise disable IPv6.
