

3.5.1 Ensure DCCP is disabled (Not Scored)

Profile Applicability

```
Level 1 - Server  
Level 1 - Workstation
```

Description

The Datagram Congestion Control Protocol (DCCP) is a transport layer protocol that supports streaming media and telephony. DCCP provides a way to gain access to congestion control, without having to do it at the application layer, but does not provide in-sequence delivery.

Rationale

If the protocol is not required, it is recommended that the drivers not be installed to reduce the potential attack surface.

Audit

Run the following commands and verify the output is as indicated:

```
# modprobe -n -v dccp  
install /bin/true  
# lsmod | grep dccp  
<No output>
```

Remediation

Edit or create the file `/etc/modprobe.d/CIS.conf` and add the following line:

```
install dccp /bin/true
```
