

1.2.2 Ensure GPG keys are configured (Not Scored)

Profile Applicability

Level 1 - Server
Level 1 - Workstation

Description

Most packages managers implement GPG key signing to verify package integrity during installation.

Rationale

It is important to ensure that updates are obtained from a valid source to protect against spoofing that could lead to the inadvertent installation of malware on the system.

Audit

Run the following command and verify GPG keys are configured correctly for your package manager:

```
# apt-key list
```

Remediation

Update your package manager GPG keys in accordance with site policy.
